**DETAILED ACTION*****Examiner's Comments***

1. This action is in response to applicant's amendment received 11/13/2007. The pending claims are 2-7.

***Specification***

2. The disclosure is objected to because of the following informalities: the continuation information submitted on 1/8/2004 was not included in the more recent specification submitted on 5/24/2004, but needs to be included. Please re-submit the continuation information to be incorporated in page 1 of the specifications. Appropriate correction is required.

***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 2-7 are rejected on the ground of nonstatutory double patenting over claims 1-39 of U. S. Patent No. 5,312,023 (hereinafter '023) since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: Claims 1-39 of the '023 patent define the same apparatus for applying surgical fasteners:

Art Unit: 3721

- an elongated member defining a longitudinal axis (claim 1)
- a staple storage portion (cartridge assembly in claim 8)
- a control member capable of rotating the elongate member about the longitudinal axis (first, second and third means for effectuating rotation and articulation, claim 1)
- an advancing mechanism capable of advancing a surgical fastener through the storage portion (claims 1 and 2)
- an anvil (claim 7)

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See MPEP § 804.

### ***Response to Arguments***

5. With respect to the specification, the Examiner notes that the amendment received on 5/24/2004 replaced the specifications submitted via the preliminary amendment received on 1/8/2004 and therefore, the objection to the specification is maintained because the continuity data in the most recent version of the specifications is not up to date and requires correction.
6. Applicant's arguments with respect to the prior art have been overcome and are moot in view of the new ground(s) of rejection. For the reasons above, the grounds for rejection are deemed proper.

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
